

# SPIRITUAL ALCHEMY

## DISCOVER THE PHILOSOPHER'S STONE WITHIN

Alchemy is the Science of the Soul, designed for achieving spiritual perfection via very specific and comprehensible steps. As one of the oldest sciences on the planet, it's primary goals are to accelerate spiritual evolution and to aid in perfecting physical creation. Through alchemy, one's vibration may be heightened utilizing both practical (physical) and transcendental (spiritual) processes, thereby clearing negative patterns and purifying the body, mind, and soul.

Two of the main pillars of western alchemy are the practical Kabbalah and the Tree of Life. The Tree of Life, a *map for creation*, shows humankind how to consciously join together with the forces of evolution and it gives individuals the opportunity to transform themselves and their world. This is about becoming a fully actualized human, known to the kabbalists as the Adam Kadmon or 'perfected god-like human', in all areas of one's life.

Taught by Dr. Theresa "IBIS", who has a Ph.D. in Physics and has studied extensively, the Ancient Teachings of Life Energy and Spiritual Mastery. Her Mission is to bridge age-old esoteric teachings and methods with the cutting edge energy, science, and technology advances of today in order to help people improve their quality of life and awaken their highest potential within. Theresa's work comes at a critical time in history as Quantum Physics now aligns with much of what has traditionally been considered Spiritual Mysticism.

Join us for this informative and experiential class.

August 18th, 19th, & 20th 7pm to 10pm

Cost \$250, if register by July 12th only \$200

Hosted By:
